**Abstract of CN1296112**

The present invention relates to a digital code electronic lock, and is characterized by that optimized lock core a key circuits, or optimized lock core, key and lock-matching device circuits are used. As compared with existent technology, said invention possesses the following advantages: low cost, small volume, it does not use battery, simple and convenient operation, it is applicable to door, cabinet, drawer, box, bag, bicycle, motorcycle and car.
